Project

➢ Vrinda Sales analysis – Ms Excel
- **Data Cleaning**: Experienced in cleaning and preparing data for analysis (handling errors, formatting).
- **Data Visualization**: Can create charts and graphs (line, bar, pie) to visualize sales trends.
- **Sales Analysis**: Analysed sales data to identify trends, forecast sales, and improve performance.
- **Reporting**: Created reports and dashboards to present data findings effectively.

➢ E-commerce dashboard - powerBI
- Created a Power BI dashboard for sales analysis.
- Created interactive dashboard to track and analyse online sales data.
- Used complex parameters to drill down in worksheet and customization using filters and slicers.
- Creates connections, joins new tables, performs calculations to manipulate data, and enables user-driven parameters for visualization.

➢ Sales Analysis - python
- Performed data cleaning and manipulation.
- Performed Exploratory data analysis (EDA) using pandas, matplotlib and seaborn libraries.
- Improved sales by identifying most selling product categories and products, which can help to plan inventory and hence meet the demands.
